About Me

- I am currently a research-based Master's student at the College of Computing & Data Science, **Nanyang Technological University (NTU)**, supervised by Prof. Eng Siong Chng. Prior to this, I received my B.Eng. degree in Computer Science and Technology from Jinan University in 2025, with English as the medium of instruction. My research focuses on speech LLMs and reinforcement learning, with a particular emphasis on **controllable and expressive speech generation**. I am dedicated to building **Paralinguistic-Aware LLMs** to enable more natural and human-like speech interaction.
-  I enjoy talking to and learning from different people, whether it's about research plans, career development, or life in general. I'm also open to academic collaboration opportunities. Please feel free to contact me if you are interested!
